

APPENDIX A

References

A-1. Required Publications.**EM 1110-2-6050**

Response Spectra and Seismic Analysis for Concrete Hydraulic Structures.

American Concrete Institute (2002)

American Concrete Institute. 2002. Building Code Requirements for Structural Concrete. ACI 318. Box 19150, Redford Station, Detroit, MI 48219.

Concrete Reinforcing Steel Institute (2001)

Concrete Reinforcing Steel Institute. 2001. Evaluation of Reinforcing Bars in Old Reinforced Concrete Structures. Engineering Data Report Number 48.

Ebeling, Perez-Marcial, and Yule (2006)

Ebeling, R. M., E. J. Perez-Marcial, and D. E. Yule. 2006. Response Amplification of Idealized Powerhouse Substructures to Earthquake Ground Motions. Department of the Army, Army Corps of Engineers, Engineer Research and Development Center, Information Technology Laboratory, Vicksburg, MS. ERDC TR-06-3.

Federal Emergency Management Agency (2000)

Federal Emergency Management Agency. November 2000. Prestandard and Commentary for the Seismic Rehabilitation of Buildings. FEMA-356. Washington, DC.

Federal Emergency Management Agency (2003)

Federal Emergency Management Agency. 2003. NEHRP Recommended Provisions for Seismic Regulation of New Buildings and Other Structures – Part 1 Provisions. FEMA-450-1. Washington, DC.

Federal Emergency Management Agency (2003)

Federal Emergency Management Agency. 2003. NEHRP Recommended Provisions for Seismic Regulation of New Buildings and Other Structures – Part 2 Commentary. FEMA-450-2. Washington, DC.

Federal Emergency Management Agency (2005)

Federal Emergency Management Agency. June 2005. Improvement of Nonlinear Static Seismic Analysis Procedures. FEMA-440. Washington, DC.

United States Geological Survey (2002)

United States Geological Survey. 2002. Integrated Probabilistic Ground Motion for the Conterminous 48 States by Latitude-Longitude. <http://eqhazmaps.usgs.gov>.

A-2. Related Publications.

PL 101-614

National Earthquake Hazards Reduction Program (NEHRP) Reauthorization Act, November 1990.

Executive Order 12941, 1 December 1994

Seismic Safety of Existing Federally Owned or Leased Buildings.

ER 1110-2-100

Periodic Inspection and Continuing Evaluation of Completed Civil Works Structures.

ER 1110-2-1155

Dam Safety Assurance.

ER 1110-2-1806

Earthquake Design and Evaluation for Civil Works Projects.

EM 1110-2-2400

Structural Design and Evaluation of Outlet Works.

EM 1110-2-3001

Planning and Design of Hydroelectric Power Plant Structures.

EM 1110-2-6063

Earthquake Design and Evaluation of Concrete Hydraulic Structures.

ETL 1110-2-533

Lifeline Report Number 1, Systems at Risk from Earthquakes, Hydroelectric Power Plant Facilities.

Federal Emergency Management Agency (1998)

Federal Emergency Management Agency. January 1998. Handbook for the Seismic Evaluation of Buildings-A Prestandard. FEMA-310. Washington, DC.

Federal Highway Administration (1995)

Federal Highway Administration. May 1995. Seismic Retrofitting Manual for Highway Bridges. U.S. Department of Transportation. FHWA-RD-94-052.

Ebeling (1992)

Ebeling, R. M. 1992. Introduction to the Computation of Response Spectrum for Earthquake Loading. Department of the Army, Army Corps of Engineers, Information Technology Laboratory, Vicksburg, MS. Technical Report ITL-92-4.

Fenves and Chopra (1985)

Fenves, G., and A. K. Chopra. June 1985. Simplified Analysis for Earthquake Resistant Design of Concrete Gravity Dams. Earthquake Engineering Research Center, University of California, Berkeley, CA. UCB/EERC-85-10.

Hines, Dazio, and Seible (2006)

Hines, E. M., A. Dazio, and F. Seible. January-February 2006. Structural Testing of New East Bay Skyway Piers. ACI Structural Journal.

International Building Code (2003)

International Building Code. 2003. International Code Council, Inc., 5203 Leesburg Pike, Suite 708, Falls Church, VA.

Lukose, Gergely, and White (1982)

Lukose, K., P. Gergely, and R. N. White. September-October 1982. Behavior of Reinforced Concrete Lapped Splices for Inelastic Cyclic Loading. ACI Structural Journal. p. 355-365.

Moehle (1992)

Moehle, J. P. 1992. Displacement-Based Design of RC Structures Subjected to Earthquakes. Earthquake Spectra, Vol. 8, No. 3, p. 403-428.

National Center for Earthquake Engineering Research (1993)

National Center for Earthquake Engineering Research. March 1993. Assessment of the 1991 NEHRP Provisions for Nonstructural Components and Recommended Revisions. State University of New York at Buffalo, Red Jacket Quadrangle, Buffalo, NY. Report NCEER-93-0003.

National Institute of Standards and Technology (1994)

National Institute of Standards and Technology. February 1994. Standards of Seismic Safety for Existing Federally Owned or Leased Buildings, and Commentary. ICSSC RP 4.

National Institute of Standards and Technology (1995)

National Institute of Standards and Technology. October 1995. ICSSC Guidance on Implementing Executive Order 12941 on Seismic Safety of Existing Federally Owned or Leased Buildings. ICSSC RP 5.

Newmark and Hall (1982)

Newmark, N. M., and W. J. Hall. 1982. Earthquake Spectra and Design. Earthquake Engineering Research Institute. EERI Monograph Series.

Paulay (1980)

Paulay, T. May-June 1980. Earthquake-Resisting Shearwalls--New Zealand Design Trends. ACI Structural Journal.

Paulay and Priestley (1992)

Paulay, T., and M. J. N. Priestley. 1992. Seismic Design of Reinforced Concrete and Masonry Buildings. John Wiley and Sons, Inc.

Priestley and Park (1987)

Priestley, M. J. N., and R. Park. January-February 1987. Strength and Ductility of Concrete Bridge Columns under Seismic Loading. ACI Structural Journal.

Priestley, Seibel, and Calvi (1996)

Priestley, M. J. N., F. Seible, and G. M. Calvi. 1996. Seismic Design and Retrofit of Bridges. John Wiley and Sons, Inc.

Priestley, Verma, and Xaio (1994)

Priestley, M. J. N., R. Verma, and Y. Xaio. August 1994. Seismic Shear Strength of Reinforced Concrete Columns. ASCE Journal of Structural Engineering, Vol. 120, No. 8.

Qi and Moehle (1991)

Qi, X. and J. P. Moehle. January 1991. Displacement Design Approach for Reinforced Concrete Structures Subjected to Earthquakes. Report No. Earthquake Engineering Research Center, University of California, Berkeley, CA. EERC 91/02.

Rosenbloeth and Contreas (1977)

Rosenbloeth, E., and H. Contreas. October 1977. Approximate Design for Multicomponent Earthquakes. ASCE Journal of the Engineering Mechanics Division.

Seed, Ugas, and Lysmer (1976)

Seed, H. B., C. Ugas, and J. Lysmer. 1976. Site-Dependent Spectra for Earthquake-Resistant Design. Bulletin of the Seismological Society of America, p. 221-243.

Structural Engineering Institute (2003)

Structural Engineering Institute. 2003. Seismic Evaluation of Existing Buildings. SEI/ASCE 31-03.

Strom and Ebeling (2005)

Strom, R. W., and R. M. Ebeling. 2005. Seismic Structural Considerations for the Stem and Base of Retaining Walls Subjected to Earthquake Ground Motions. Department of the Army, Army Corps of Engineers, Engineer Research and Development Center, Information Technology Laboratory, Vicksburg, MS. EDRC/ITL-05-3.

Watson, Zahn, and Park (1994)

Watson, F., F. A. Zahn, and R. Park. June 1994. Confining Reinforcement for Concrete Columns. ASCE Journal of Structural Engineering, Vol. 120, No. 6.

Wilson, Suharwardy, and Habibullah (1995)

Wilson, E. L., I. Suharwardy, and A. Habibullah. November 1995. A Clarification of the Orthogonal Effects in a Three-Dimensional Seismic Analysis. Earthquake Spectral, Volume 11, No.4.

Wood (1989)

Wood, S. L. September-October 1989. Minimum Tensile Reinforcement Requirements in Walls. ACI Structural Journal, Vol. 86, No. 4.

Wood (1990)

Wood, S. L. January-February 1990. Shear Strength of Low-Rise Reinforced Concrete Walls. ACI Structural Journal.
